

BOX COMPRESSIONS TESTER

DIGITAL box compression tester

The box compression tester is designed and manufactured as per the requirements of transport packaging case pressure test; it confirms ISO2872 and ASTM D642 pressure tests. It is applicable to carry out proof pressure, deformation and stowage tests for flexible packaging cases with corrugated cases, honeycomb crates, and other packaging cases.

Maximum load: 2000.0 KGF

- Accuracy rating: Grade 1
- Effective force measurement range: 0.4%-100%
- Force measurement precision: Within $\pm 0.5\%$ of indicated value
- Effective testing space: Upto 1,000mm*1,000mm*1,000mm (Mention when order will be placed)
- Range of test speed: Variable up to 200mm/min. or Custom specified
- Speed accuracy: within $\pm 5\%$ of the indicating value.
- Accuracy of displacement measurement: within $\pm 1\%$ of the indicating value.

Load, Cross head Movement & Speed Display: Seven Segment L.E.D 0.5"

Paint : Powder coated & Chrome finished

Power : 230 Volts, 50/60Hz, single phase,
